

Name: _____

How to Grow a Cactus Indoors

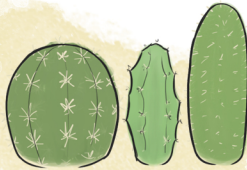

Materials:

Dish

Spoon

Cacti (5 or 6)

Gravel

Growing soil

Potting Soil

Instructions:

The steps below are out of order! Figure out the right order, then number them from 1 to 6, and you'll be able to grow your own cacti!

Step # _____

Add more soil. Use a spoon to get in between spots.

Step # _____

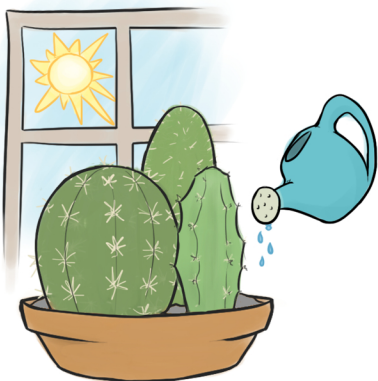

Remove your cacti from their pots and put them in your dish. Be careful! Start at the back and move forward.

Step # _____

Fill your dish with soil. Make sure to leave 2 inches at the top.

Step # _____

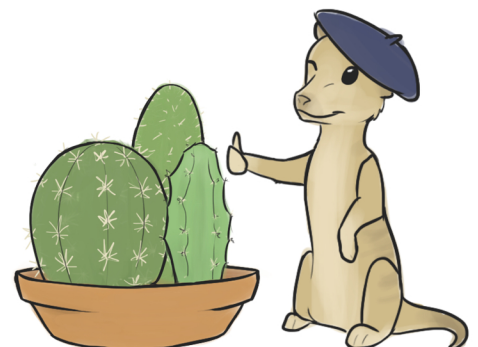

Water your cacti sparingly and keep them somewhere sunny where they can get 4-6 hours of sunlight.

Step # _____

Add a thin layer of gravel.

Step # _____

Decide how you want to arrange your cacti.
